PROFESSIONAL SUMMARY

Backend Engineer with 3+ years of experience designing and shipping scalable SaaS products, AI-powered automations, and cloud-native softwares. Proficient in NestJS, Node.js, and full-stack development, Python with a consistent track record of reducing manual effort, improving software performance, and delivering clean, production-ready code. Turning the backend logic into business magic.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C, C++

Frameworks: Node.js, NestJS, NX Monorepo, React.js, Next.js,

Databases: PostgreSQL, MySQL, MongoDB (NoSQL), Redis

Methodologies: Agile methodologies

Tools: Socket.io, REST APIs, Postman, API Documentatio, Swagger API, Message Queues like BullMQ, Redis Pub/Sub Model, Jira

Cloud & Devops : Git, CI/CD, Docker

AI Integrations: OpenAI SDK, Prompt Engineering, Vector Databases, LLM integration

Authentication & Security: JWT, OAuth 2.0, Session Management, Role based access control (RHAC)

Testing: Jest, Chai, Mocha

Frontend: HTML, CSS, Bootstrap, jQuery, TailwindCSS

Core Concepts: OOPs, DSA, AI Integrations & Agents, Microservices Architecture

Consistency & Learning: Problem solving in typescript, python with following DSA, Machine learning using python

WORK EXPERIENCE

Transcodezy IT Solutions Pvt. Ltd. | Client - Product

Dec 2024 – Present

Backend & DevOps Engineer

- Led backend development of 4+ production-grade scalable softwares, collaborating with mobile, web, and UI/UX teams.
- Enforced code quality and consistency across large codebases using NX Monorepo and structured architecture patterns.
- Reduced server load significantly by implementing BullMQ message queues for heavy, blocking computational tasks.
- Leveraged AI-assisted development to boost delivery speed while maintaining high standards of code review and logic quality.

Kmphitech Pvt. Ltd. | Client

Sept 2024 – Dec 2024

Backend Engineer

- Built and maintained backend services in Node.js for client-facing applications, working cross-functionally with mobile and web teams.
- Make Improved code quality and consistency across codebase.
- Developed and collaborated with mobile app teams to integrate APIs.
- Learn new feature in javascript to improve & create efficient APIs.

Codexial Technologies Pvt. Ltd. | Client

April 2023 – August 2024

Backend Developer Intern

- Learned and applied Node.js, TypeScript, NestJS, Socket.IO, GraphQL, and gRPC fundamentals through real project implementations.
- Built an efficient NestJS boilerplate and wrote unit tests using Jest for backend logic in both Node.js and NestJS projects.
- Learned and practiced a demo project named “Customer support ticket software” and “movie booking software”.

KEY PROJECTS

Invoicely | Next.js · NestJS · MongoDB · NX Monorepo

Live Demo – Github Link

- Open-source GST invoice management platform built for Indian businesses to automate invoicing workflows and save time.
- Implemented secure Google OAuth login via Firebase SDK, eliminating password management overhead for end users.
- Building WhatsApp reminders and E-Way Bill generation features tailored for manufacturing businesses.

Boultbody | Next.js · NestJS · MongoDB · AWS S3 · Backblaze B2

Live Demo

- Architected database schema and RESTful APIs for a cloud storage platform (similar to Google Drive / TeraBox) offering 100GB free storage.
- Integrated Razorpay (web) and Google Play in-app purchases with subscription tracking and payment history.

- Implemented HLS video streaming, CDN integration, and multipart file upload via AWS SDK pre-signed URLs for large file security.
- Integrated Socket.io for real-time file/payment sync, MaxMind for IP-based pricing localization, and FCM for push notifications.
- Configured branded email service using EJS templates with AWS SES, and deployed apps to DigitalOcean VPS with CI pipelines.

AsupRecords | *Next.js · NestJS · MongoDB · AWS SES · NX Monorepo* Live Demo

- Designed a generalized MongoDB schema for a music distribution & royalty management platform serving artists, labels, and DSPs.
- Built comprehensive RESTful APIs covering artist catalogs, label management, royalty tracking, finance, support tickets, and notifications.
- Architected the platform as a white-label solution — multiple tenants can operate with their own branding, payment gateway, and pricing.
- Integrated Razorpay and Stripe dynamically per white-label tenant, and deployed with Docker + DigitalOcean VPS + CI pipelines.

CERTIFICATIONS & AWARDS

Full Stack Development | Creative Design & Multimedia Institute

CCC Certification | Step Up Institute

Integrity Pledge | Central Vigilance Commission

Codewars Competition — 2nd Position (Round 1) | Creative Design & Multimedia Institute

BCA Academic Trophy | Ranked 1st in 1st and Final Semester — Saurashtra University

EDUCATION

MSc. Information Technology | Saurashtra University

2024 – 2026

BCA — Bachelor of Computer Applications | Saurashtra University

2021 – 2024
